# NO VISIBLE LAVA

## HPC-6007 + PUR-1200

**Basin®**  
a base for a better living

This invisible 2 component water-based varnish is designed for finishing new, untreated or freshly sanded parquet as well as other rough wood parts, providing a long-lasting and matt finish.

**Pay attention:** only suitable for light wood types and not suitable for veneers thinner than  $\pm 1,5$  mm, to avoid glue penetration. On dark and exotic wood types, we recommend NO VISIBLE NUANCE HPC-5009 + PUR-1010. **View technical datasheet before use.**

Pot Life

Mixing Ratio

### ADVANTAGES

#### Ecological

This product conforms to EN-71.3 and has a very low VOC emission.

#### No yellowing

The varnish does not yellow through time\* and perfectly maintains the colour and natural gloss of clear wood species.

\*wood types that naturally yellow at a faster rate, can show a small degree of yellowing despite the high degree of protection.

#### Permanent anti-UV-components

Contains permanent anti-UV-components that slow down the natural yellowing of the wood (with a total finish of 240 g/m² or 80 g/m²/layer).

#### High abrasion resistance

$\pm 59$  mg (CS10 / 1.000 rotations)

#### No odour nuisance

#### Very low VOC level

30 g/L (after mixing)

#### Dries quickly

#### Stain resistant

### PACKAGING

0,9 L HPC-6007 + 0,1 L PUR-1200  
(box of 6 x 1 L)

4,5 L HPC-6007 + 0,5 L PUR-1200  
(box of 2 x 5 L)
